

THE GLEICHEN CALL

VOLUME XXVIII NO. 11

GLEICHEN, ALBERTA, WEDNESDAY MAY 29, 1935

SUBSCRIPTION \$2.00 PER YEAR

GOLF CLUB HOLD ANNUAL MEETING GOLF COURSE READY

The annual meeting of the Gleichen Golf Club was held in the Legion Hall, and as usual, only a few members turned out to display any interest in the club affairs.

Executive officers for last year were re-elected to continue handling club business until such time when more interest is being displayed and another meeting can be held. Club fees for 1935 were reduced to two dollars for adults, and a dollar and a half for ladies, and a dollar for everybody under 21 years of age.

Work has been done on all the greens of the golf links, the fairways have still to be cleaned but outside of this it is possible to enjoy a game of golf at any time and the club officers would like to see all members taking advantage of the links and get out and play while the course is in good shape.

The club secretary has a limited amount of work to offer the sons of members and to boys who intend joining the club, and will be glad to receive applications for this so it can be divided among the applicants. All are asked to be prompt with the membership fees, the absurdly small fee being charged this year makes it necessary to get the amounts in so that the work can be kept going.

SAYS SOCIAL CREDIT AS PROPOSED WILL NOT WORK

(By John Glambied.)

Since coming back out to the country I find that the majority of the farmers have been bitten by the social credit bug, in fact it looks as though 75 per cent will vote for it. After all it is hardly to wonder at. We know that the past five years have been terrible on the farmers, particularly in the west, a series of crop failures, combined with below cost prices on all farm products. This has reduced many formerly well to do farmers to poverty. The two old political parties have done nothing to help conditions and the farmers have lost faith in them.

Social credit will help a few of the better off farmers but the rank and file will not touch. The U. F. A. government, which for 14 years have held the power in Alberta, have passed several acts that helps to keep the farmers temporarily on the land, but the real trouble confronting the farmers has not been touched by this government. In the case of labor and the unemployed, the government has acted no different from old parties, and as a consequence many both farmers and workers, who formerly supported the U. F. A. government will not support it at the coming election.

At the opportune moment Mr. Aberhart has stepped out and organized the discontent and his movement has swept the province like wildfire. Very few of the social credit supporters understand the intricacies of the system, but what they do understand is that it would not do for every grown man and woman to receive \$25.00 per month. As a matter of fact Mr. Aberhart is the first and only man who offers anything tangible.

I do not intend to go into the social credit scheme, but I want to point out the utter impossibility of putting it through.

Those who know how our present system of capitalism operates know that it is based on private ownership of the means of production, distribution, finance and raw material. That production is carried on for profit to the owning class, and we also know that during world crisis where it does not pay for the owning class to put men to work, as the manufactured article cannot be sold at a profit to them, they close the factories and throw the workers on the street. I claim that the only way the workers can ever get what they produce, the buying power needed is to overthrow the capitalism using class and substitute collective ownership. But if I understand social creditors right, they have no intention to abolish the capitalist class, they want to retain the banks and all, and put their credit system to work inside capitalism, which is impossible. We may all be foolish, more or less, but

if anybody thinks that capitalists are going to sit quietly by with hands folded while Aberhart proceeds to give out to the people those profits, which they, the capitalists have allotted to them, they are just a little bit foolish, and some fine morning, they will wake up to the real situation.

Suppose the social creditors elect the new government and proceed to Edmonton with Aberhart as premier, how long would it take, after they started with their plans until international banking interests and the interests of the whole capitalist class, and out of Alberta would have a couple of regiments of soldiers, a few tanks, air planes, etc., and sweep the whole shooting match of social creditors out of Edmonton and establish a dictatorship?

A revolution, you say, but don't forget that all the power, the soldiers, the guns and ammunition is at present in the hands of the capitalists and the dear people are unarmed.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

Gleichen is planning to put on its second stampede June 24th and 25th.

Monday afternoon there was a good crowd of citizens at the depot to see the last of the 31st Battalion leave for Europe. Among the Gleichen volunteers passing through were Frank Viger and Theo Woodland.

Mr. Beck of Craigantler had his misfortune to break his wrist last week.

A large number of people attended the stampede at Namao on the 24th about 6 o'clock that evening a heavy rain set in.

The rains of the past weeks have made the farmers rejoice as the prospects for a bumper crop never looks brighter than at present and the grain is coming in very fast.

K. G. G. is a prominent horse dealer at Cluny who purchased one of finest Shire stallions that has been seen in the district for sometime.

A box social at Blind Creek realized \$5.00 was the limit allowed for a box and that was reached several times.

Strange to say that out of all the Canadians reported as killed in the war, not one from Gleichen has yet been reported. May it continue to be so is the most earnest prayer of all.

E. R. Johnston, our popular tailor, disposed of his business to Messrs. McCormick & White, and has left to Winnipeg to join his wife and family.

Bruce Palmer of Crowfoot spent a couple of days in town this week.

Tax collectors have their troubles but it is not often they receive such communications as the appended recently received by our local collector: "Say Shrock—Enclosed find P.O. for taxes. Send me receipt for same. If you are in need of another dollar or two let me know by return."

E. Tondreau, the torsorial artist, left Monday for his home in Bedford, Maine.

In times gone by the people of this town were anxious to change the name of the town for the reason that many pronounced it "Galacian." Since the war broke out there are other reasons advanced for changing the name.

The ladies are becoming quite enthusiastic and expert pool players since they have been allowed Wednesday afternoons at the Opera House Pool rooms.

TRANSPLANTING TREES

When trees die after transplanting the cause may often be ascribed to lack of sufficient care on the part of the transplanters. Trees and shrubs should be dug out as carefully as possible so as to retain a large proportion of the roots. The more roots there are the greater the chance the plant has of living. The roots should not be allowed to become dry from the time of digging until the trees are in the ground again. They may be protected from drying in transit by protecting them with wet moss or wet sacking. If the trees are to be stored for a long time, become dry even for a short time, they are almost sure to die. When planting, a hole should be dug large enough so that the roots may be spread out and not crowded or doubled up. The hole should also be deep enough so that the tree will be one or two inches deeper than it

BLACKFOOT M. D. SET MILL RATE AT LAST MEETING

The Blackfoot municipal council held their regular meeting for May in the municipal office Gleichen. This was their fifth meeting for 1935. All the councillors were present.

The members decided to purchase an elevating truck, preferably with an auxiliary motor and Messrs. Bolinger, Thorson and Wheatley were appointed a committee to view the Adams machine and the Union Tractor or machine. They will select the machine that they think best for the work required in this district and will give the order on behalf of the municipality.

Councillor Bolinger moved: That we set the 1935 mill rate for municipal purposes at \$6 mills on the dollar. In the discussion following this motion the 1934 estimates were discussed and the financial statement showed that one of the estimated expenses had cost more than anticipated. The council thought this should be avoided in 1935. There was also indignant account to be met and provision to be made for a grasshopper campaign. Other motions and their connection were also discussed followed by an amendment. Councilor Bolinger moved: That the 1935 mill rate for municipal purposes be set at 6 1/2 mills on the dollar. A motion carried.

Councillor Wheatley carried the following motion: Whereas it is necessary to funds to meet the demands of the various non-collecting school districts within this municipality, therefore be it resolved that the secretary-treasurer of this municipality be authorized and directed to levy the following rates against assessable lands and minerals in the various school districts noted below and to collect the amounts produced therefrom: viz: Alton 7 1/2 mills; Craigantler 1; Crowfoot 6; Carnarvon 5; Elwood 5; Hammett Hill 6; Jeanne d'Arc 5; Living Rock 3; Living Spring 5 1/2; Mountain View 6; Rolly Land 8; South Valley 5; Shamrock 4 1/2; Wheatley 5 1/2.

It was decided to make application to the Bank of Commerce for a credit of \$10,000 for municipal purposes with the understanding that the current taxes alone will be pledged as security.

Regarding the seepage from the anal and the flooding the road south of S.W. and south of S. E. 3-23-23, the secretary was instructed to write Mr. Rockton at Stratmore and ask that he trouble be remedied.

was in the woods or nursery. If the soil is at all poor, it should be discarded if possible. The soil will be with good soil which should come in close contact with the roots and be trodden down. Manure should not be put in with the soil as it may burn the roots or make the soil so loose that it will dry out easily. Several pamphlets dealing with tree planting for ornamental and other purposes are issued by the Dominion Department of Agriculture. They are available on application to the Publicity and Extension Branch, Ottawa.

During this season, the touring bureaus operated at branches on the Alberta Motor Association in Edmonton, Calgary and Lethbridge are expecting heavy demands for service. At these offices where courtesy is one of the by-words, every consideration is given to the requests of motorists desiring information. Experts who have made a careful study of routes are able to pick out the most comfortable ones, so that motorists may travel one way and return by another, never once covering the same ground unless there is a desire to see some sections twice during the trip.

From time to time the motor office receives letters of communication for their routing services. Mileages, gauges, hotels, all forming the official appointments of the A.M.A., are shown on these maps. For those seeking good hunting or fishing spots, the maps contain valuable information.

The maps are of particular value to visitors, of whom greatly increased numbers are expected to visit Alberta parks and other beauty spots during the coming season. In view of the campaign inaugurated by the Canadian Travel Bureau to attract a greater number of tourists, the highway directional maps will be of extreme assistance.

RAIN PUTS STOP TO EMPIRE DAY SPORTS PROGRAM

Rain interfered and put a stop to the program of sports billed for Empire Day, much to the disgust of the children. The parade which took place before the rain came was the finest parade ever held in Gleichen. It was the postponed Jubilee Parade and a great number of local and district organizations and several hundred children from the surrounding schools took part.

The Gleichen Brass Band very fittingly led the way with music. The Blackfoot Indians were present in large numbers in full regalia, mounted on their ponies. The Gleichen School Band from Crowfoot School at Cluny. This band was a surprise to many people and looked very snappy in their uniforms. Rangers, Scouts, Guides, and Brownies from the entire district were present in full uniform, including the Blackfoot troops, all of which created a most favorable impression to the spectators along the route of march.

One of the outstanding events was that the 22nd Battery, C.A., had again asked special permission to participate and was present in the parade and the hollow square formation at the fair grounds. The Gleichen Branch of the Empire Service League also joined in the ceremonies.

From the auto camp site the line-up marched to the fair grounds followed by a great number of cars, where a special formation was taken up. Lt. Col. A. G. C. Lewis spoke briefly on Empire Day. Mayor Ostrander presided over the proceedings. Every school child was then presented with a Johnnie Mac. One honker was then run off. The drummer and bugle band was duly carried out giving all the children plenty to eat amid a pouring rain which was greeted with mixed feelings, both welcome and unwelcome.

Down town the youngsters amused themselves with setting off firecrackers. In the evening the dance sponsored by the Hockey Club in the Community Hall was well attended and this Gleichen wound up another Empire Day.

U. F. W. A. PLANNING TO HAVE BIG BAZAAR IN FALL

Another pleasant and busy afternoon was spent by the Gleichen U. F. W. A. at the home of Mrs. H. Sammons. Mrs. H. Burne occupied the chair, and roll call was answered by "A country I would like to visit." Correspondence was read, among which was a letter from our representative, Mrs. McDonald, announcing a prospective visit to our local sometime in July by Mrs. Mulvey. Everyone is looking forward to this.

A busy summer was planned by the members during which time they are going to busy themselves by preparing articles for a bazaar to be held later on, sometime in the fall.

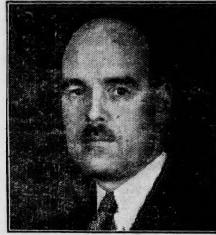

Mrs. Oliver read a book review. Mrs. J. C. Eakley read a book review. Mrs. C. M. Grindell read a very interesting story from the jungles of Africa. Everyone enjoyed themselves and were glad to forget for a while the harassing problem of dust storms. The next meeting will be held at Mrs. R. Oliver's.

While returning to Crowfoot Indian School on Empire day, with over 20 Indian children aboard the Gleichen Gunners armoured car turned over on its side in the ditch at Cluny. Only one child was hurt, receiving a cut on the face from a broken window. Mr. G. M. Smith, the driver, states he was crowded off the road by a west bound truck. He had to stop the car, hopped on the road and swerved over to the ditch and turned over. Mr. Peacock lost no time in phoning Corp. Ashby here, describing the car and occupants. The Corporal succeeded in catching the car as it was passing through Gleichen.

to parks and other beauty spots during the coming season. In view of the campaign inaugurated by the Canadian Travel Bureau to attract a greater number of tourists, the highway directional maps will be of extreme assistance.

Your opportunity to meet and consult the Tip Top Tailors'

STYLIST

W. D. LOWDEN
who will be at our store

SATURDAY, JUNE 1ST

MEN! This is important!

Mr. W. D. Lowden, the Tip Top Tailor's Stylist, will visit our store, where he may make a personal obligation by men in this town on any occasions of style, fabric or color pertaining to a well-dressed appearance.

The benefit of Mr. Lowden's experience is of course given without obligation. He offers this one and only reason why you should come to our store, at least to compare, before you order Spring and Summer clothes anywhere.

More woolens than ever make up the Tip Top Spring and Summer collection—more styles—better tailoring and finish—yet the price remains \$24.75 for your unrestricted choice.

R. A. BROWN,

"TOO MUCH WEALTH IN THE HANDS OF A FEW PEOPLE"

In the countryside, in the streets of villages, towns and cities; in homes, in market places, from pulpits and public platforms; from men in many walks of life you hear the same pronouncement—"Too much wealth in the hands of too few people."

Who can rectify such an unsatisfactory state of affairs?

In many instances the people themselves have the remedy.

In the grain business the grain growers have the remedy in their co-operative marketing organization. All they need to do is to give their patronage.

Co-operative organization is the most effective means of preventing accumulating of great fortunes in the hands of a few people.

Co-operation never makes millionaires.

Parachutist Makes Perilous Descent

Dragged Along Ground Two Hundred
Yards After Jump

A parachutist who made a perilous descent from 1,600 feet in a strong wind over Reading aerodrome recently because he did not want to disappoint a waiting crowd broke his leg above the ankle.

"I have never seen a parachutist carried so fast. We all thought he had been killed when he reached the middle of the aerodrome," said a member of Reading Aero club.

Mr. Gwynne Johns, 25, the parachutist, is an ironmonger's clerk in a store at Aberystwyth.

He had taken a week's holiday to make an attempt on the record drop before the parachute is opened, and was paying for it from his modest wages. He makes a hobby of parachuting.

Earlier in the day he flew from Reading to Salisbury Plain to attempt to jump from 2000 feet and to drop 1800 feet before opening his parachute. Over the Plain however, it was raining heavily and no jump was possible.

Flight-Lieut. R. E. Milne, chief instructor at Reading, Mr. Johns' pilot, said: "When we got back to Reading Gwynne Johns thought he would do a small jump, not an attempt on the record."

"There was a stiff wind and we advised him not to do so. He landed quite well, however, but drifted very fast and was dragged flat on the ground about 200 yards."

"I feel jumping a relief from the monotony of my work," Mr. Johns said before his flight. "Falling through the air has always attracted me immensely. I made my first parachute jump about two years ago. I have made 17, my best from a height of 13,000 feet, delaying the opening of the parachutes for 45 seconds—a fall of 9,000 feet!"

Bricks To Be Larger

The Hamilton Spectator says if critics in the future take to throwing real brick-bats at politicians and editors they are liable to raise larger bumps than if modern critics took up the sport. For bricks are going to be larger. It has been found, after intensive research in New York City, that builders can save money by enlarging the bricks, and economy in these days is not to be despised.

Walt Disney, who gave the Silly Symphonies and Mickey Mouse to the world, got his start as an artist drawing cartoons for comic weeklies.

France originated the idea of honoring an unknown soldier as a symbol of all those who lost their lives in defense of their country.

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak health and vitality. Clear skin attracts. The healthy active girl is the happy and popular girl.

Perhaps you are not sure when the day's work is done you are too tired to enter into the good times that other women enjoy. For extra energy, take a daily Pill. It tones up your general health. Gives you more pep—more charm.

Remember that 95 out of 100 women report benefit. Let's help you too.

Pardon For Convict

Man Serving Life Sentence Is Freed
For Aid Given To Science

A convict who volunteered his body for the testing of a tuberculosis preventive some time ago, will trade the prison number that hid his identity for 20 years for an unfettered freedom.

He will quit the grim shadows of the penitentiary in Canyon City, Colorado, to become a "tramp preacher" to the underworld and the underworld—a life devoted to saving others from the hell he came to know himself.

At the "peep" he was known as Harry Ross, serving a life stretch for his implication in the killing of a bank clerk during a holdup. But as freedom neared he disclosed the name was a blind to save his wife from the stigma of a convict-husband, and their five children of a convict father.

He will again become Henry F. Ferrin—the name he dropped as he entered the prison gates in August, 1915.

Ross, or Ferrin, gained a full pardon as one of three convicts chosen to undergo experiments under Dr. H. J. Corper of Denver, who developed an anti-tuberculosis serum.

He gained 12 pounds after he was inoculated with the serum and live tubercular bacilli were injected into his blood stream to determine if the serum had made him immune to the disease.

The other two convicts also completed the tests successfully.

Ferrin said he plans to work a little and preach a lot.

"My audiences will be the underdogs. In my long years of contact with convicts I discovered the average preacher does not reach most of them.

After he has been out in the sun a while—"enough to chase the prison pallor"—Ferrin expects to visit the five children he has living in various parts of the United States. He won't see his wife.

"My wife divorced me," he explained. "She remarried and I do not plan to call on her. It might embarrass her."

More Powerful Engines

Experts Predict Change In Motors
For British Planes

Aero engines no longer or heavier than those now in service but capable of developing 1,000 horse-power while consuming fuel at more economical rates than at present are likely to emerge from British factories within the next two years, it is predicted at London.

During the last year power output of British motors has risen by some 25 per cent, without any corresponding increase in weight or size. Much of the improvement is explained by adoption of fuels of higher "octane" number, which do not detonate so readily and thereby enable compression to be increased and power output augmented. A further 25 per cent increase is now feasible, if fuels of a yet higher "octane" value can be made available.

Turned Over To Women

Small Hamlet in Kansas Now Under
"Petroleum Rule"

Mayor-elect, Mrs. Susie Murphy; police judge, Mrs. Laura Shelton; and councilwomen, Mrs. Susie Blinn, Mrs. Effie Laughlin and Mrs. Kathryn Bivins. They met in the kitchen of the mayor-elect the other day. Not to gossip about the absent neighbors nor to discuss the high cost of foodstuffs but to map the campaign of "petroleum rule" for New Albany, Kansas. New Albany, a resourceful hamlet of nearly 200 inhabitants, was practically turned over to the women in the recent municipal election.

After these women take office on May 7, they will be watched by every sensible male in the country. The slightest slip will be front page, "Tell us so." But who knows—from such a beginning may come a future woman president of the United States—Detroit Saturday Night.

Frasier Valley Ideal

On his way back to his dairy farm in Chilliwack, B.C., after a six months visit to his former home in the Netherlands, Count A. F. Van Rechteren-limpurg arrived at Montreal on the Montreal. He described the Fraser Valley, in British Columbia, as the ideal place for settlement.

"Dairy farming there," he said, "is very much the same type of farming as in Holland." The count was accompanied by his wife.

A German high school teacher had a weather record from 1819 until he died in 1872 and his daughter continued until 1917, making a 98-year record.

THE GLEICHEN CALL, GLEICHEN, ALBERTA

His Pet Invention

Philadelphia Engineer Working On
Earthquake-Proof House

A Philadelphia engineer in Washington has received Patent No. 2,000,000—more than 144 years after "one Samuel Hopkins" was issued a patent for a method of making lye.

Joseph V. Ledwinka, a native of Vienna, and chief engineer for the Edward G. Budd Manufacturing Company of this city, obtained No. 2,000,000 for an "Improvement for Pneumatic Tires on Railroad Cars."

The safety device is a flange on the side of the tire which engages the rail when the tube is deflated. Solid rubber tires can also be equipped with the device, for while they will not blow out, internal pressure and heat will melt solid tires in the middle.

By coincidence, patent No. 1,000,000 was issued to Francis H. Holton of Akron, Ohio, for "an improvement in vehicle tires."

Mr. Ledwinka's invention was made despite his belief that tires for high speed rail transportation are impractical. Having finished the work, he returned to the invention of an electrical prefabricated airdome, earthquake-proof house.

The house will be decorated in a new scheme, because wood finish cannot be imitated on metal.

"Perhaps," Mr. Ledwinka said, "the walls will be decorated with a bath-tub finish."

The house will be air-conditioned by having double walls, between which air will be forced to heat or cool the house. The car is to be well within the \$5,000 class and can be put up almost over night.

This Tip Was Different

American Tourist Left Expensive
Car With London Chauffeur

Mr. Eastwood, a London chauffeur, was given an automobile as a tip but he cannot sell it. Eastwood was engaged by an American family who wanted to see Britain. They asked him to buy a car for them. He bought a long, low-built tourer, capable of 90 miles an hour. It held six people in comfort. It took the American family all over Britain. Then, their visit over, they returned to America and left the car as a present, for chauffeur Eastwood. But when he came to sell it he could find nobody willing to buy. The car is so much above 1935 pocket that nobody will offer him enough money for it.

Roping Swans

Texas Cowboy Who Turned Zoo-keeper, Claims Swan Roping Cup

Cowboys are supposed to rope steers and maybe now and then a mountain lion for sport, but Julian Frazer, cowboy who turned zoo-keeper, claims the world champion-swan roping cup.

When the zoo in Fort Worth, Texas, needed some more swans, Superintendent Hamilton Hilton tried to catch some on a nearby lake. They were too elusive for rowboats and hands.

So Frazer got down his rope and went out to the lake. He caught six in a half-day's throwing.

Gerald—"Have you got hot and cold water in your room at the hotel?"

Ronald—"No, just tepid and lukewarm."

Town & District

Jack Bremner of Namaka had the misfortune Sunday to break his leg while playing baseball at Mooseleigh.

Miss Fergie of the telephone staff, has her sister from Calgary visiting her for a few days.

Mr. and Mrs. W. Osler and family accompanied by Mr. Fred Blitche of Queenstown spent Friday in town attending the Jubilee celebration.

Quite a number of the local sports spent the 24th at the Hussey stampede.

Miss Nora Downey who is training at the Holy Cross Hospital is down on her holidays visiting her parents Mr. and Mrs. P. Downey.

Jas. Egles, manager of Gleichen Hardware store, is in Calgary, having been summoned there for jury duty.

L. Michael had a new coat of paint put on his residence last week. Ell. Woods being the painter.

Carl Johnson, Gleichen's humorist, stated there were three events run off on Empire Day—rehearsals of winter conditions, 1st a horse race and 2nd a race for shelter and third a race to the fire. It might be added the last two events were not on the program.

The irrigation water is now on. The town gardeners did not loose a moment in order to make use of the water.

Malcolm T. Bell aged 77 years died at Eventide Home last Thursday, the funeral taking place Saturday afternoon at 2:30 at Eventide Home. Mr. A. J. Sutherland and Mr. Walker officiating. Mr. Bell was born in Collingwood, Ont. and had been in Eventide Home for the past six years. He was fairly well known about town, since up till a few months ago he was frequently seen on the streets and had become acquainted with many people.

The town painters have a great time fighting dust and rain storm. They no sooner get a house painted then a nice dust storm rises, then they have to do it all over again. The same thing happens when it rains if the paint has not had time to dry.

Dan McLeod and Scotty Gove drove to Calgary last week in Dan's big truck. Both say the road is very rough west of Strathmore.

Mrs. Pineau was called east last week owing to the serious illness of her mother.

L. Michael spent the week end in Calgary looking after his interests there.

Miss Dorothy Murray of Three Hills spent the week end visiting Mrs. N. Riddell, Sunday Miss Murray's parents also visited Gleichen.

The old fence surrounding the English church has been taken down and a new and much better one being put up. The new fence is a gift of Chas. Thompson. With the trimming of the trees and the planting of gardens by Mr. Bishop and his assistants the church yard will soon be an attractive place.

Arrowwood will play a league baseball here tomorrow night—Thursday

Dance in the Meadowbrook Hall, Friday, June 7. Prairie Ramblers Orchestra.

Gordon Riehard of Arrowwood was the guest of Hobby Riddell over the weekend.

Fire in S. Warne's home, late Friday afternoon, caused some excitement in town. Mr. Warne had the fire under control by the time the fire brigade arrived with two chemical engines. These were brought into action and in a short time the fire was pronounced out.

Here and There

With the warm weather and a fine season almost upon us, dates of opening of the summer hotels and the opening of the Canadian Pacific Railway will be welcome news to tourists. Banff Springs Hotel opens, June 15; Chateau Lake Louise, June 15; Lake Louise Hotel and bungalow camps Waterton, Yoho, Radium Hot Springs and Moraine Lake, June 21; French River Bungalow Camp, June 15; Devil's Gap Bungalow Camp, June 21; Algonquin Hotel, St. Andrews, N.B., June 26; The Pines, Digby, June 27 and the Lakeside Inn, Yarmouth, June 28.

Portland, Oregon, famous annual Rose Festival will be held this year, June 15-19. Millions of rose blooms will be on display in the many floats of the grand final parade and also in the 7th annual show of the Portland Rose Society.
